

# Make AI Work For Your Industry

Ganesh Padmanabhan,  
VP Market Development,  
CognitiveScale

Chris Belmont  
Executive Advisor,  
FTG Advisors

Scott Teeple,  
Chief Technology Officer,  
Agilify, powered by Ascension

Manoj Saxena,  
Executive Chairman,  
CognitiveScale

Can you please give me a little background  
about yourself, your organization and how  
you embraced AI ?

What are some of the common myths or misperceptions about AI in the Enterprise?

What separates the companies who got business value out of AI systems vs those that did not?

What is the single biggest factor limiting  
the adoption of AI in the Enterprise?

Most AI projects never leave the innovation lab, but all of you have been running AI in production. How did you know what problems to solve first for your organization?

Scott: I know Ascension was so successful with deploying AI to do intelligent process automation, that you spun out a company called Agilify to do it for other organizations. What was critical in making the business seeing the value?

Scott Teeple

Chris: As a CIO dealing with AI in the healthcare and insurance industries, what role did organizational structure and alignments play? Why does AI need to be industry specific?

Chris Belmont

How should enterprises adopt AI incrementally and in the midst of other technology shifts within the organization?

How can AI augment employees to drive better productivity?

What's your top predictions for AI adoption in the Enterprise  
in 2018?

# Thank You
